

# Java Magazine – January/February 2015

Hello everybody!

The January/February 2015 issue of [#java](#) Magazine has released!

In this issue, tools for Java developers working in the cloud are explored. Plus, there are action items for expanding your professional network and job opportunities.

## **Platform for Innovation**

[#oracle](#)'s Mike Lehmann discusses Java-based cloud services for the full development lifecycle.

## **Making Water Safe**

A Java-based mobile app helps rural families get clean water.

## **Get Started with Oracle Developer Cloud Service**

See how to run your entire development environment in the cloud.

## **Three Steps to Improve Your Career**

Boost your skills and network.

## **Building Modular Cloud Applications in Java**

Add, replace, or remove modules while keeping the architecture intact and maintainable.

## **Cloud-Based Monitoring of IoT Devices**

Discover a scalable cloud-based monitoring system for collecting data from embedded devices.
